

KickIT@Eclipse/2_Control
/RowControl/RowControllerKeeper.hpp

```
graph BT; A["KickIT@Eclipse/2_Control /RowControl/RowControllerKeeper.cpp"] --> C["KickIT@Eclipse/2_Control /RowControl/RowControllerKeeper.hpp"]; B["KickIT@Eclipse/2_Control /TableControl/TableControllerImpl.cpp"] --> C;
```

The diagram illustrates a header file dependency. At the top is a grey box representing the header file: `KickIT@Eclipse/2_Control /RowControl/RowControllerKeeper.hpp`. Below it are two white boxes representing source files. The left box is `KickIT@Eclipse/2_Control /RowControl/RowControllerKeeper.cpp` and the right box is `KickIT@Eclipse/2_Control /TableControl/TableControllerImpl.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include or depend on the header file.

KickIT@Eclipse/2_Control
/RowControl/RowControllerKeeper.cpp

KickIT@Eclipse/2_Control
/TableControl/TableControllerImpl.cpp
